## Summary

Experienced software engineer currently working on building a modular system of interconnected applications, internal tooling, configuring new workflows, and expanding team documentation • Has developed many applications in his own time in order to expand knowledge in areas such as physical computing and natural systems simulation.

## DBOX

Aug. 2014 - Present

### Full-Stack Developer

Built new services in a full stack JavaScript environment that have been key to the expansion of digital orderings, internal tools, and experimental products • Assisted with the expansion of the development team by creating thorough documentation, establishing patterns, and mentoring junior developers • Responsible for the upkeep of multiple on-site and hosted applications • Integrated workflow systems for continuous integration, monitoring, and logging • Has worked extensively with technologies such as NodeJS, Socket.io, Typescript, MQTT, SCSS, Angular 1.x, MySQL, Meteor, Mocha React and MongoDB • Technologies used for prototypes are React Native, and the Microsoft Kinect.

## Barrel

May 2014 - Aug. 2014

### Contract Full-Stack Developer

Contributed to the ongoing effort to modularize existing and new projects • Improved functionality and documentation of internal Wordpress framework • Consistently mentored junior developer on best practices • Assisted with the implementation of Node as an application environment • Created and finalized projects for Shake Law and SAY:Camp.

## Group SJR

Mar. 2013 - Feb. 2014

### Web Developer

Built and maintained best-in-class branded content websites for Barneys New York, Credit Suisse, GE, KKR, Levi Strauss & Co, NCTA, Target, Xerox, and others • Developed better build processes and improved development server configuration and management • Led efforts on project modularization to improve developer productivity • Collaborated heavily with internal and external teams on design and development efforts • Some of the technologies used were Wordpress, SCSS, Grunt, jQuery, EC2, and PHP.

## AD:60

Sept. 2012 - Jan. 2013

### Junior Web Developer

Primarily worked maintaining a news and reviews website, implementing new features and layouts using HTML, jQuery, Sass and CakePHP • Also involved in coding HTML email newsletters and adding new features for outside clients.

## OPT Central

Mar. 2012 - May 2012

### Junior Web Developer

Worked alongside the senior front-end developer and the in-house graphic designer creating websites for brands from the ground up • Implemented various interactive features through the use of the latest techniques, including CSS3, HTML5, and jQuery.

## LANGUAGES

Fluent in Spanish  
Proficient in Italian

## EDUCATION

### Queens College, City College of New York

Sept. 2008 - June 2012

Bachelor of Science in Graphic Design  
Minor: Business and Liberal Arts Honors Program
