Summary

I am an experienced software engineer focused on development and establishing growth within development teams.

At DBOX, I am working on building modular and client agnostic tools as well as expanding our team documentation. I also take interest in physical computing, using technologies such as Johnny-Five and Arduino.

DBOX

Aug. 2014 - Present

Full-Stack Developer

Responsible for building new services in a full stack JavaScript environment that are key to the expansion of digital offerings, internal tools and experimental developments. Assisted with the expansion of internal teams by creating thorough documentation, establishing platforms and mentoring junior developers.

Barrel

May 2014 - Aug. 2014

Contract Full-Stack Developer

Contributed to the ongoing effort of modularization within new and inherited projects. Improved functionality and documentation of internal Wordpress framework. Consistently mentored junior developer on best practices. Assisted with the implementation of Node as an application environment. Created and finalized projects for Shake Law and SAY:Camp.

Group SJR

Mar. 2013 - Feb. 2014

Web Developer

Built and maintained best-in-class branded content websites for Barneys New York, Credit Suisse, GE, KKR, Levi Strauss & Co, NCTA, Target, Xerox, and others. Developed better build processes and improved development server configuration and management. Led efforts on project modularization to improve developer productivity. Collaborated heavily with internal and external teams on design and development efforts.

Some of the technologies I used were Wordpress, Sass, Grunt, jQuery, EC2, and PHP.

AD:60

Sept. 2012 - Jan. 2013

Junior Web Developer

Primarily worked maintaining a news and reviews website, implementing new features and layouts using HTML, jQuery, Sass and CakePHP. Also involved in coding HTML email newsletters and features for outside clients.

OPT Central

Mar. 2012 - May 2012

Junior Web Developer

Worked alongside the senior front-end developer and the in-house graphic designer creating websites for brands from the ground up. Implemented various interactive features through the use of the latest techniques, including CSS3, HTML5, and jQuery.

LANGUAGES

Fluent in Spanish

Proficient in Italian

EDUCATION

Queens College, City College of New York

Sept. 2008 - June 2012

Bachelor of Science in Graphic Design

Minor: Business and Liberal Arts Honors Program
